Sprint Report 3

Product Name: HitchHike

Team Name: Uplyft

Date: 11/17/2019

Actions to stop doing:

We need to stop pushing to master without testing. We also need to stop saying that we are

"done" with a task if we have not tested it and also if it does not align with our definition of

done. We would also like to stop procrastinating on tasks. This leads to a lower quality product

and a worse user experience.

Actions to start doing:

Start following a more test-driven development style and we should start collaborating more

between developers working on front-end components and backend components since we are

seriously lagging behind on integration. We should also update the scrum board regularly to

know who has finished what (especially because there was not a lot of communication between

front-end and back-end developers).

Actions to continue doing:

We would like to continue having productive scrum meetings that always last less than 15

minutes, this was a major improvement over previous sprints. We would also like to continue

doing something from the previous sprint, which was having coding sessions where we spend a

few hours straight completing tasks. This has helped us be more collaborative and productive as a team.

Work Completed:

We completed all of the user stories that we had listed. This included:

- I am a rider and I want to be able to see my driver's contact information.

- I am a rider and I want to be able to see my driver's rating so that I can feel safe.

- I am a driver and I want to be able to see my riders' contact info so that I know who to pick up.

Work Completion Rate:

- Total user stories completed: 3

- Total number of ideal work hours: 40

- Total number of days: 14

- User stories per day: 2.86

- Total number of ideal work hours per day: 3
