Revision date: 10/7/2019

High-Level Goals:

- Have people sign up with .edu email addresses post rides from location A to location B
- Allow riders to search and view available rides
- Sign up for rides
- Rate rides and riders

User Stories:

Scrum scores are on a scale of 1-5, with 1 being easy, 5 being difficult
- Sprint 1:
    - I am a rider and I want to sign up with my school email because I want to make an account (2)
    - I am a driver and I want to sign up with my school email because I want to make an account. (2)
    - I am a rider and I want to be able to sign in because I want to request a ride. (2)
    - I am a rider and I want to know that my driver is a student because I want to be safe. (2)
    - I am a driver and I want to be able to sign in to offer rides. (2)
    - I am a user and I want to be able to verify my email in order to make the app more secure. (4)
- Sprint 2:
    - I am a rider and I want to be able to view rides so that I can see what riders are available. (3)
    - I am a driver and I want to be able to post rides so that I can get other people to ride with me (3)
    - I am a rider and I want to be able to request a ride because I want to get from one place to another (3)
    - I am a driver and I want to be assured that my ride won't overfill because I want to obey the law (4)
- Sprint 3:

- ○ I am a rider and I want to be able to see my driver's contact information. (2)
  - ○ I am a rider and I want to be able to see my driver's rating so that I can feel safe. (2)
  - ○ I am a driver and I want to be able to see my riders' contact info so that I know who to pick up. (3)
- ● Sprint 4:
  - ○ I am a user and I want to be able to post a picture of myself so my riders'/driver can recognize me (4)
  - ○ I am a user and I want to be able to rate my drivers so other people know about my experience (5)
  - ○ I am a user and I want to be able to navigate through the app easily so it acts as a good replacement to the Facebook group (2)
